# Long Title

Philip Linden<sup>1,†</sup>, Michael Zemcov<sup>2</sup>

Received (to be inserted by publisher); Revised (to be inserted by publisher); Accepted (to be inserted by publisher);

Very abstract. Much interesting.

Keywords: A list of 3–5 keywords are to be supplied, separated by commas.

### 1. Introduction

The introduction goes here. Discuss the relevance to NASA, including the science objectives of the mission and how the mission satisfies a Probe class mission. Describe the scope of the paper, including how the design of the spacecraft is driven by the science objectives.

### 1.1. Requirements

Also explain the requirements of a spacecraft that should make these observations, including the spectral and spatial characteristics, sensitivity, and logistics (*i.e.* location, lifetime).

# Acknowledgments

Thanks.

## References

A complete list of references cited, arranged in alphabetical order according to the surname of the first author, should be provided. References by the same author will follow a chronological sequence, *i.e.*, (?) precedes (?). Article titles should be stated in full but standard abbreviations should be used for journal names. Typeset reference in 10 pt Times Roman, single spaced with baselineskip of 12 pt.
